Biography

I am Associate Professor in Gerontology and currently acting Director at the [Centre for Innovative Ageing \(CIA\)](#) at [Swansea University](#). I have a particular interest in improving public policy and practice around the built environment and transportation taking into account an ageing population requiring sustainable and environmental contexts, including road user safety in later life, giving-up driving and creating age friendly neighbourhoods and communities. I have worked on 36 projects as PI or Co-I totalling over £14m research income. I am currently Principal Investigator on 3 projects, the EU funded £3.8m Institute of Creative Ageing Industries, to bring creative industry partners together with older people to co-develop products, services and technologies for an ageing population, the Welsh Government funded £3m Centre for Ageing and Dementia Research (CADR) project to bring together research in ageing with policy and practice across Wales, and the £500k ageing and social impacts of Active Building Project examining older people's perceptions and behaviour living in smart, low carbon homes. I have authored 35 journal articles, 18 book chapters and have 4 books on these topics. I am an Executive committee member of the British Society of Gerontology (BSG) and co-lead the Special Interest Group at BSG on mobilities and transport in later life and using this to generate network and interest in this field from within and outside academia. I am also a member of the International Association of Applied Psychology and am a partner of the European Innovation Partnership on Active and Healthy Ageing. My research has involved several invited International and national presentations at conferences and invited presentations to the House of Commons and House of Lords. I am keen to get my research out into the real world and work closely with UK, Welsh and local government, charities and third sector organisations and am keen on public engagement. I have presented at two British Science Festivals (2008 and 2016) and written many articles for the general public. I have appeared on BBC TV and international radio stations on a variety of mobility and built environment topics and appear regularly on BBC Three Counties radio discussing older people's issues. I am Editor-in-Chief for Elsevier's [Journal of Transport & Health](#) and on the editorial board for [Ageing and Society](#) and [Research in Transportation Business & Management](#) journals. I am a panel member for the United Kingdom's Engineering and Physical Sciences Research Council (EPSRC). I am the University's environment lead for the REF UoA20 and am Engagement and Societal Impact lead for the College of Human and Health Sciences. I completed my PhD at the [Transportation Research Group](#) back in 2004 at the University of Southampton exploring driver behaviour and attitudes to risk and spent some scary moments collecting in-vehicle data with young male "boy racer" drivers. I was delighted to be a runner-up in Swansea University's [Research as Art](#) competition [2013](#) and [2016](#).
