Biography

I am Associate Professor in Gerontology at the [Centre for Innovative Ageing \(CIA\)](#) at [Swansea University](#) and head-up the Environments and Ageing research strand. I am Operational Director of the £3million [CADR project](#), an initiative to develop and enhance research, policy and practice for older people across Wales. I have a particular interest in improving public policy and practice around transportation taking into account an ageing population requiring sustainable and environmental contexts. Prior to joining CIA I was Senior Lecturer in Traffic & Transport Psychology with the [Centre for Transport and Society](#) at the [University of the West of England](#), Bristol, UK. My research addressing ageing and transport spans four interconnected areas:-

- (1) [Road user safety and ageing.](#)
- (2) [Older people, travel behaviour change and health and wellbeing.](#)
- (3) [Giving-up driving for later life.](#)
- (4) [Age friendly communities](#)

I've also been involved a variety of other [transport and attitudes](#), [built environment](#), [technology & mental health projects](#).

I have advised policy on transport issues, for example worked with the Parliamentary Council for Transport Safety on older people's transport issues. I am an Executive committee member of the British Society of Gerontology, where I am editor of their journal, *Generations Review*. I co-lead the Special Interest Group at BSG on mobilities and transport in later life and using this to generate network and interest in this field from within and outside academia. I am also a member of the International Association of Applied Psychology. I am a partner of the European Innovation Partnership on Active and Healthy Ageing. My research has involved several invited International and national presentations at conferences and invited presentations to the House of Commons and House of Lords. I am keen to get my research out into the real world and work closely with UK, Welsh and local government, charities and third sector organisations and am keen on public engagement. I have presented at two British Science Festivals (2008 and 2016) and written many articles for the general public. I have appeared on BBC TV and international radio stations on a variety of mobility and built environment topics and appear regularly on BBC Three Counties radio discussing older people's issues. I am an Associate Editor for [Journal of Transport & Health](#) and on the editorial board for [Ageing and Society](#) and [Research in Transportation Business & Management](#) journals. I am a panel member for the United Kingdom's Engineering and Physical Sciences Research Council (EPSRC). I am the University's environment lead for the REF UoA20 and am Engagement and Societal Impact lead for the College of Human and Health Sciences. I completed my PhD at the [Transportation Research Group](#) back in 2004 at the University of Southampton exploring driver behaviour and attitudes to risk and spent some scary moments collecting in-vehicle data with young male "boy racer" drivers. I was delighted to be a runner-up in Swansea University's [Research as Art](#) competition [2013](#) and [2016](#).
